

VACUUM TESTER “SafeSEAL”: when it comes to food safety

The safeSEAL leak detection device checks the consistency of the seal and detects small and hidden micro leaks.

The safeSEAL ensures consistency in food safety of any kind of sealed packaging, thanks to his

- compact design
- easy water exit
- durable materials and solid construction
- highly maneuverable and easy transport (3 wheels with brake; one side flattened)
- suitable to test all sizes of sealable packaging
- easy and foolproof operation, maintenance and repair

Price
€ 3945
excl. VAT

The Vacuum test with the safeSEAL is twofold

1. detecting micro leaks by a visual test.
 2. checking the strength of the seal with a manometer.
- The manometer allows to define exactly the sealing value of the product.

safeSEAL - Technical features and parts
